Re: WC Docket No. 02-306.

Dear Ms. Dortch:

New Access Communications LLC is a small CLEC who recently entered the local telephone service resale market in California. We are sending this comment in response to PAC Bell's request for authority to sell interLATA service in California under section 271 of the Telecommunications Act of 1996, WC Docket No. 02-306.

Although our time working with PAC Bell has been limited, we wanted you to know that our experience with our PAC Bell account manager (Miryam Villalobos) has been very positive. The success of an RBOC's wholesale program--and the long term success of competition as contemplated by the 1966 Act--depends in large part on the competence and responsiveness of the employees who staff and lead the RBOC's wholesale division. A viable resale program, whether traditional resale or UNEP, in the long term requires an entity that is committed to the development of resale as a distribution channel.

We have been impressed with the quality of service we have received to date from our PAC Bell account manager. While we do not have sufficient experience to comment on all aspects of PAC Bell's OSS and other matters that may be relevant to the pending application, we can say that we are favorably impressed with the quality of service provided to us to date, and that we think this reflects favorably on PAC Bell's section 271 application.

Greg Wilmes  
CEO  
New Access Communications LLC
